## Specifications

- [1] Main ON/OFF Switch
- [2] Function Buttons
  - Red Button: ON Light & Magnetism Display
  - L/UV: Longwave UV – 7 watt
  - S/UV: Shortwave UV – 2 watt
  - WL: White Light Illumination
  - MG: Magnetism Test
- [3] Magnetism Sensor
- [4] White Light Platform
- [5] Power Cord plugs into Reverse Voltage Converter
- [6] Aspherical Distortion Free 12x Magnifier
- [7] Aspherical Distortion Free 3x Magnifier

Unplug adapter from power source when not in use.

## Suggested Uses

### Longwave Uses (L/UV Button):

- Identify fluorescent inks and paper (tagging) on stamps.
- Detect forgeries and repairs.
- Check authenticity of coins, banknotes, certificates, etc.

### Shortwave Uses (S/UV Button):

- Check phosphor and overall tagging on stamps.
- Detect difficult tagged stamps, such as blocks.
- Photograph fluorescence of rocks and minerals.

### White Light Uses (W/L Button):

- Examine paper varieties, colors, watermarks, etc.
- Look for bends, tears, repairs.

### Magnetism Sensor Uses (MG Button):

- Check magnetic area of currency by rubbing item on magnetism sensor.

## AC VOLTAGE CONVERTER

We can only recommend using the AC adapter supplied by us to eliminate overheating. We also recommend using a power surge protector to protect against electrical surges.

Unplug adapter from power source when not in use.

# Philalux<sup>3</sup>

**Three tools in one!**

## Safeguards

1. Do not shake the unit.
2. Keep the unit dust free.
3. Only use the supplied voltage converter.
4. We recommend using a power surge protector to protect against electrical surges.
